PROFESSIONAL SUMMARY

Aspiring Machine Learning Engineer and Data Scientist with experience building ML, DL, and NLP solutions using Python, PyTorch, TensorFlow, Scikit-learn, SQL, PySpark, and Spark SQL. Skilled in data cleaning, preprocessing, feature engineering, model training, evaluation, and working with structured and unstructured data. Familiar with ETL, Azure Databricks, Azure Data Factory, Delta Lake, MLflow, and cloud platforms. Skilled at translating business problems into AI and data-driven solutions.

TECHNICAL SKILLS

Programming: Python, SQL, R, C, MATLAB, Scala

Machine Learning / Deep Learning: Scikit-learn, TensorFlow, PyTorch, classification, regression, neural networks, deep learning, feature engineering, model evaluation, model monitoring, retraining, transformers, GANs

NLP / AI: Spark NLP, RAG, named entity recognition, sentiment analysis, transformer embeddings, LLM applications, Agentic AI

Big Data / Data Processing: PySpark, Spark SQL, ETL, data ingestion, data cleaning, preprocessing, structured and unstructured data pipelines, batch processing, Azure Databricks, Delta Lake, Azure Data Factory, ADLS Gen2, Key Vault

Databases / Analytics: PostgreSQL, joins, CTEs, window functions, indexing, query tuning, SQL performance optimization, large dataset analytics, optimization workflows

Visualization / Tools: Power BI, Tableau, Excel, Git, GitHub, VS Code, PyCharm, Jupyter Notebook, Google Colab

EDUCATION

University of Michigan - Dearborn, Master of Science in Data Science | Dearborn, MI | Expected Dec 2026

GPA: 3.84/4.00

Mahindra University, Bachelor of Technology in Artificial Intelligence | Hyderabad, India | Aug 2020 - Aug 2024

EXPERIENCE

Data Analyst Intern, MeriSKILL | Hyderabad, India | Sep 2023 - Oct 2023

- Collected, cleaned, and validated structured datasets using Python and SQL to improve data quality for analysis and reporting.
- Built Power BI and Tableau dashboards to communicate KPIs, actionable insights, and stakeholder-focused business findings.

SELECTED PROJECTS

FinInsight: AI-Powered Financial Analysis Platform | Jan 2025 - May 2025

Big Data, NLP, PySpark, Retrieval-Augmented Generation

- Built an end-to-end PySpark analytics pipeline combining structured SEC EDGAR data with unstructured CNBC and Reddit text, using distributed ingestion, preprocessing, Spark NLP, named entity recognition, sentiment analysis, and transformer embeddings for semantic search.
- Implemented a LangChain RAG workflow with FAISS indexing and FLAN-T5 to answer natural-language financial questions, translating a business problem into a grounded, context-aware AI solution.

AmazonDB: E-Commerce Database and Sales Analytics | Jan 2025 - May 2025

PostgreSQL, SQL Optimization, Data Engineering, Data Quality

- Designed and implemented a normalized PostgreSQL database for e-commerce orders, products, and shipping, with relational integrity, analytics-ready schema design, and scalable SQL reporting support.
- Cleaned and quality-checked a real-world Amazon sales dataset in Python, reducing 128,976 records to 120,350 reliable records, and developed SQL analytics using joins, CTEs, and window functions, improving query performance by about 37% through indexing and query tuning.

Feedforward Neural Network for Stock Market Trend Prediction | Jan 2025 - May 2025

PyTorch, Deep Learning, Regression Modeling, Model Training

- Collected, preprocessed, and analyzed historical stock market data, engineered features for next-day price prediction, and performed exploratory analysis across S&P 500 and sector stocks.
- Designed, trained, and evaluated a PyTorch feedforward neural network using ReLU, dropout, Adam, and MSE loss for regression forecasting, monitoring model behavior through prediction plots and trend analysis.

CERTIFICATIONS

Machine Learning Specialization, Coursera | Apr 2025 - Jun 2025

Generative AI for Data Analysts, Coursera | Apr 2025 - Jun 2025
